

Document Control Log

Stop letting document control take over your day. Omnant simplifies complex management with a structured log system that keeps your lab compliant and audit-ready.

The Solution

Omnant simplifies document control for construction materials testing labs, turning complex compliance tasks into an organized, automated process.

From AASHTO R18 support to version control and scheduled reviews, Omnant keeps your lab audit-ready and efficient across all locations.

Functionality

AASHTO R18 Compliance Support

Make accreditation reviews straightforward by clearly presenting your documents, procedures, and expertise.

Scheduled Document Reviews

Stay ahead of your document reviews with automated reminders, so critical tasks never slip through the cracks.

Version Control

Always access the latest version of every document, test, or report with Omnant's version control.

Benefits

Proactive notifications

- Get alerts for upcoming document reviews, from calibration records to maintenance procedures and more.

Manage lab equipment

- Add, update, and track equipment, service records, and vendor details – all in one system.

Standardize across locations

- Enter documents once and make them accessible to all technicians across every office and aligned to the right jobs.

Best practices

- Follow methods that align with technical accreditation organizations.
