

Quality System

Maintain AASHTO R18 compliance and stay audit-ready with integrated document control, version tracking, and corrective action management that supports your accreditation preparation.

The Solution

A strong Quality Management System is key to delivering consistent, reliable, and high-quality lab testing.

Omnant's software goes beyond compliance by reinforcing best practices and streamlining processes for construction materials testing teams.

Functionality

AASHTO R18 support

Showcase your lab's commitment to quality by turning compliance reviews into proof of a strong quality management system.

Corrective actions

Document every step taken to resolve nonconforming findings and drive continuous improvement.

Version control

Always work with the most current document and eliminate confusion over outdated versions.

Benefits

Quality control

- Build trust with clients and accreditors by keeping your quality system organized with document logs and version control.

Issue tracking

- Assign issues to the right team member and give project managers clear visibility into status and progress.

Audit ready

- Stay prepared for every review while reducing administrative work and avoiding last-minute scrambles.

Quality reviews

- Stay ahead on document reviews, resolve nonconformities, assign responsibilities, and maintain QMS best practices.
