

# Scheduling System

Equip your team with tools that simplify scheduling and resource management. Omnant's integrated system delivers real-time visibility and control, helping dispatchers keep operations efficient and clients satisfied.

## The Solution

Omnant eliminates repetitive scheduling tasks like dispatching phone calls, writing schedules, and coordinating personnel on spreadsheets.

It gives schedulers and team members the tools that they need to manage assignments quickly and accurately.

## Functionality

### Centralized scheduling

Assign inspectors to field work and manage team schedules from one convenient, centralized location.

### Portable schedules for inspectors

Give your team instant access to their schedules anywhere, so they always know where to go.

### Client scheduling portal

Let clients request appointments anytime through a dedicated portal, so they never have to wait for office hours.

## Benefits

### Easy dispatch support

- Equip dispatchers with software that keeps them responsive, adaptable, and free from juggling disconnected platforms.

### On-the-go scheduling

- Give technicians instant access to schedules, maps, and project details, replacing paper and whiteboards with one simple tool.

### Online inspection requests

Enable clients to request inspections through a dedicated portal for 24/7 convenience

### Responsive tools

- Avoid costly delays and client miscommunication with scheduling tools that keep your projects on track.
