

Certification Tracking

Omnant's certification tracking helps you track your team's certifications and make sure the right person is assigned to every job.

The Solution

Omnant's proactive notification system keeps your entire team ahead of renewal deadlines with advanced digital certification tracking capabilities.

Don't let expired certifications put your commercial construction and engineering projects at risk or cost you valuable time.

Functionality

Complete Certification Management

Track certification expiration dates, renewal requirements all in one place

Proactive Reminders

Set custom notification schedules so your team never misses important certification deadlines and reduce time spent sending reminders

Certification-based Scheduling

Match certifications to specific schedule assignments to ensure a certified technician is assigned to those jobs

Benefits

Single, secure location

- Eliminate the scramble to produce certification documents when requested – it's all in Omnant

For small & large teams

- Omnant manages certifications for your entire team – big or small, in one office or across multiple locations

Track any certification

- From ACI, ASTM, NICET and more – you can track any certification in Omnant, including internal trainings

Unlimited certifications

- You can track an unlimited number of certifications per member of your team
